THE MOUNTAINEERS CLIMB

The boys begin work in the shop building.

The Mountaineers of Madison County High School are climbing to reach those not-too-distant heights that every school throughout the nation strives for. We think that we have made progress. Our more recent progress includes a new shop building, a band, elementary music, a public address system, a tape recorder, an elementary SCA, and an FFA farm. Then, the blueprints of our progress pictures a new high school building. We have confidence that, as we climb, we shall be constantly going over the tops of our mountains.

J. Berry, P. Johnson, D. Yowell, B. Jenkins, H. Updike, and C. Carpenter perform as part of our band.

Right: Extract from Bonnie Garter's winning speech.

Our "Vocie of Democracy" contest winner looks happy, doesn't she ?

I SPEAK FOR DEMOCRACY

You and I, the present generation, the future leaders of America, must uphold this democracy, preserve it and fight for it if need be. We must hold fast the principles for which our forefathers so bravely fought and established.

I speak for democracy because I feel so strongly that it will last forever. But we must do our part to keep the light of democracy glowing.

The French Club participates in the Christmas program through singing a carol in French.

The French Club is a comparatively new club in our school, having just been established as an official school club the latter part of last year. Last year was also the first time in a number of years that French had been taught at MCHS. With the promise of more members being added to our club next year, we hope to continue our progress and secure further our goal of establishing liberal views and wide interest in the language and the country.

ENGINEERING SKILLS.....AND THE COLD WAR

Our strength, both industrially and militarily depends upon the engineering and mechanical skills of the men and women in American industry. On the military front, our losses have been even more spectacular. Russia was the first nation to launch an earth satellite, with the immense propaganda advantage gained. Russia has set the aggressive pace in the development of intermediate and long range guided missiles - the greatest and most dangerous instruments of war.

Unless we have the technical men in our industry...in the military forces...in the research - we stand to lose not only our prosperity - but perhaps even our freedom and lives as well. It's a grave situation. But you can help to do something about it. First, you can train yourself in the necessary mechanical, scientific and technical subjects. Second, you can remain in school as long as possible, realizing that a high school education is the minimum requirement in specialized industrial work.

A technical career can offer you more than rewarding, gratifying work - it will help you pave the way to a more secure, more productive nation.
